SOUND FAMILIAR?

The problems you live with

- ✗ Airbnb takes **~15.5% of every booking** — even from guests who already know you.
- ✗ The platform **owns your guest list**. You can't easily invite past guests back next season.
- ✗ **Getting paid across borders** is a hassle — currencies, fees, and foreign bank accounts.
- ✗ Your guests wonder: "**Is it safe to send money** for a home in Mexico?"
- ✗ You manage it all **from thousands of miles away**.

HERE'S THE FIX

Everything you need, built in

All the booking power of Airbnb — without the parts that frustrate you.

- ✓ **Keep your rate.** A flat \$15-\$49/month, or just 5% per booking — never a 15% cut.
- ✓ **Own your guests.** A private guest list that's yours, with one-click re-invites timed to the winter season.
- ✓ **Get paid your way.** Take payment in dollars, Canadian dollars, or pesos — paid out to a U.S., Canadian, or Mexican bank.
- ✓ **Trust built in.** Funds held safely until check-in. Every owner verified. Optional ID screening and up to \$1M damage protection.
- ✓ **Two languages, automatically.** Booking and guest messaging work in English and Spanish, translated for you.
- ✓ **Taxes & accounting handled.** We calculate and collect lodging taxes, remit Mexican host taxes where required, and hand you tax-ready statements across all your homes — the hardest part of renting in Mexico, done for you.
- ✓ **Run it from anywhere.** Give your local caretaker their own access, and let guests check in on their own.

 **The trust difference:** because we hold the payment in escrow until check-in, your guests book a home in Mexico with total confidence — and you look as polished as any resort, under your own property's name.
