

Familiar Guest

Direct booking for your rental — without the hassle

You already have guests who love your place. They come back year after year, they refer their friends, and they trust you. So why are you still paying Airbnb 15% every time they book?

Familiar Guest lets you take bookings directly from your own guests — with payments, rental agreements, and trust protections handled automatically. No website to build. No software to learn. Just share a link.

How It Works

You're live in under an afternoon. Seriously.

1. **Set up your listing** — upload a few photos, add your description (or let AI write one for you), and connect your Airbnb calendar so availability stays in sync.
2. **Get verified once** — a quick identity check (takes most people under five minutes) so your guests know they're booking with a real, verified owner.
3. **Share your booking link** — text it, email it, put it in your holiday card. Your guest sees your property name, your photos, your price. Not ours.
4. **We handle the rest** — payment processing, a digital rental agreement, automated check-in instructions, and a house manual your guests can pull up on their phone.

Your guests **never create an account**. They click your link, pick their dates, pay, sign the rental agreement, and they're confirmed. Works beautifully on mobile.

Why This Beats What You're Doing Now

vs. Airbnb (for guests you already know)

- **Keep 100% of your rate** instead of giving up 15.5% per booking
- **Own the guest relationship** — their contact info, stay history, and preferences belong to you
- **No platform ranking games** — your repeat guests book directly with you

vs. Venmo / "just send me the money"

- **Escrow protection** — guest funds are held until check-in, so both sides are protected
- **Rental agreement included** — auto-generated, digitally signed, stored forever
- **Looks professional** — a branded booking page, not a Venmo request

vs. Building your own website

- **No website to maintain.** No hosting, no plugins, no updates.
- **Payments, agreements, and messaging built in** — you don't assemble anything
- **Calendar syncs with Airbnb, VRBO, and others** so you never double-book

What Your Guests See

When you share your booking link, your guest lands on a clean, mobile-friendly page that shows:

- Your property name and photos (not our brand — yours)
- Available dates (synced from your calendar)
- Price breakdown with no hidden fees
- A "Verified Owner" badge
- A digital rental agreement to sign before paying
- Secure payment via credit card

After booking, they automatically get confirmation, check-in instructions, and a digital house manual — all on your schedule, all customizable.

Built-In Trust (for You and Your Guests)

This is the part that makes direct booking actually work for both sides:

Protection	What it does
Escrow	Guest payment is held until check-in — not released early. If something goes wrong, the money hasn't disappeared.
Verified Owner	Every owner passes an identity check. Your guests know you're real.
Rental Agreement	Auto-generated per booking, digitally signed, legally stored. No more PDF email chains.

Damage Deposit	Held separately, released automatically after your inspection window.
Guest Screening	Optional ID and fraud check for guests you don't know yet.

Plans & Pricing

EARLY ACCESS As part of our founding owner group, **your access is free during the evaluation period.** The plans below show what pricing will look like once we launch publicly — you'll be grandfathered at preferred rates.

Plan	Price	Best for
Pay-as-you-go	5% per booking + card processing fees	Seasonal owners or light usage
Solo	\$29/month, no commission (up to 5 properties)	Active owners with 6+ bookings/year
Pro	\$59/month, no commission (6-10 properties)	Owners with several homes

Optional add-ons (any plan):

Add-on	Price	What you get
Guest Screening	\$5 per booking	ID verification + fraud check
Protected Booking	\$19.99 per booking	Screening + up to \$1M damage protection

Card processing fees (Stripe) are always passed through at cost — we don't mark them up.

When does Solo beat Pay-as-you-go? If you book more than ~\$7,000/year through Familiar Guest, the \$29/month flat rate saves you money vs. the 5% commission.

What We Need From You

We're building this for owners like you — not property managers, not Airbnb power hosts. Real people with a place they love, and guests they already know.

During the evaluation period, we'd love your honest feedback on:

- Is the setup actually as easy as we think it is?
- Would you send this booking link to your repeat guests?
- What's missing that would make you use it for every booking?
- How does the guest experience feel from your guests' perspective?

Your input directly shapes what we build. This is a small, intentional group — not a mass beta.

Getting Started

Your invitation is coming soon with a direct link to set up your property. The whole process takes about 20 minutes:

1. Create your account (email — no password to remember, we use magic links)
2. Upload photos and describe your place
3. Connect your calendar
4. Complete the one-time identity verification
5. Share your booking link with a guest

Questions? Just reply to the email that brought you here, or text me directly. This is personal — I want to get it right.
